

BrokerVerse

Process Flow to Screen Walkthrough

Every step of the 16 signed-off BDOI process flows, shown against the BrokerVerse screen that performs it. 111 screens captured from the running platform with the responsible personas.

BDO Insurance & Reinsurance Brokers · captured 2026-09-23

delivered by

About this walkthrough

What it shows

One section per process flow in HL_Process_Overview. Each step of the flow sits beside the menu, tab and action in BrokerVerse that performs it.

How the screens were made

A browser script ran every process for real on the platform, signing in as the persona the flow prescribes at each step: the NB officer quoting and the Underwriting Head approving, the cashier receiving and the Finance Head releasing the disbursement. Nothing is a mock-up.

Controls that surfaced while capturing

A held cheque cannot be matured before its four-day clearing date, and a cancellation endorsement blocks any later claim on that policy. Both are the intended controls.

Data

All names and amounts are sample records from the demo seed.

01

BDOIR End-to-End

The umbrella flow that chains new business, cashiering, collections, remittance, disbursement, the general ledger, renewal and claims. Each link is captured in detail in its own process below; these screens show the control points that tie the chain together.

Screens 14 steps captured

Steps in this flow

- 02.01 MAO creates the client in Broker; KYC details captured
- 02.02 Client is sanction-screened automatically (clear / hit) and risk-tiered
- 02.03 Quotation prepared with the rating engine (premium, VAT, DST, LGT, commission)
- 02.04 Quotation created (status: quoted); hold cover can be requested from the insurer
- 02.05 Proposal sent to the client by email (status: proposal sent)
- 02.06 Client acceptance recorded (Y); a decline with reason is the N branch
- 02.07 Placement requested: placement slip goes to the insurer via SFTP or email
- 02.08 Placement board tracks slips awaiting the insurer, returns and e-policies
- 02.09 Insurer placed the risk; e-policy received (COG via SFTP or PO email)
- 02.10 Booking and invoicing raised for checker approval (maker-checker)
- 02.11 Underwriting Head (checker) reviews the booking request
- 02.12 Booking approved: invoice, journal and e-policy dispatch are posted automatically
- 02.13 Policy register: the policy is in force with its invoice and e-policy channel
- 02.14 Policy detail: placement history, e-policy status and the exception route to the contact centre

Operations

Cashiering channels, post-dated cheque hold, unapplied premium, direct payments with commission receivables, adjustments and production reconciliation.

Source flow OPERATIONS PROCESS FLOW.pdf

Personas cashier → checker

Screens 17 steps captured

Steps in this flow

- 03.01 Cashiering: open invoices (premium receivables) awaiting payment
- 03.02 Receive payment: channel (bills payment, OTC cash/cheque, batch files, autopay) and reference
- 03.03 Cheque payment recorded and held for the 4-day clearing period
- 03.04 PDC register: held cheques, matured, bounced (exclusion list) and unapplied premium
- 03.05 Held cheque shows Matured / Bounced actions once the 4-day hold lapses
- 03.06 Cash / bills payment applied in full: official receipt issued and receivable cleared
- 03.07 Payment with zero PR / payment greater than PR is recorded without an invoice
- 03.08 The amount sits in Unapplied Premium (GL 2400) until applied to an invoice
- 03.09 Direct payment to insurer identified for a booked policy
- 03.10 Commission receivable (GL 1250) billed to the insurer; follow-up until collected
- 03.11 Commission collected: commission official receipt issued
- 03.12 Adjustment / cancellation validated by the Adjustment Team and routed to the checker-poster
- 03.13 Endorsement pending checker approval; a refund creates a Refund Request Form (RRF) on approval
- 03.14 Production reconciliation: insurer production file matched against booked policies
- 03.15 Rows classified as matched, with discrepancies, or unbooked; each gets a disposition
- 03.16 Checker-poster reviews the endorsement
- 03.17 Endorsement posted: premium and commission reversed, RRF raised for the refund

Case Management (To-Be)

General vs account-related inquiries, positive identification, point-of-contact handling or referral to the fulfilment unit, TAT monitoring and return to CCC.

Source flow CASE MANAGEMENT TO BE PROCESS
FLOW_07152026.pdf

Personas compliance

Screens 6 steps captured

Steps in this flow

- 10.01 Contact logged: general inquiry (no client) vs account-related concern
- 10.02 General inquiry handled and closed at point of contact
- 10.03 Account-related concern: positive identification (PID) and routing to the owning unit with a TAT
- 10.04 Case referred to the fulfilment unit; TAT due time computed and past-TAT flagged
- 10.05 Case returned to the Customer Contact Centre for re-logging with a reason
- 10.06 Case re-logged and back in the open queue

Product Maintenance (TSU)

Technical Services Unit request for non-packaged risks: completeness and duplicate check, quotation slip, TL approval, RI referral, insurer responses, comparative table and proposal slip; package maintenance with release advisory.

Source flow PRODUCT MAINTENANCE TSU PROCESS_0709.pdf

Personas admin → uw.head

Screens 11 steps captured

Steps in this flow

- 16.01 PRF / TSU request for a non-packaged risk with completeness and duplicate check
- 16.02 TSU acknowledges the request (or returns it as incomplete)
- 16.03 Quotation slip prepared and approved by the TL
- 16.04 RI referral cleared; quotation slip sent to insurers
- 16.05 Insurer responses recorded (accepted with evidence / declined / conditional); comparative table ready
- 16.06 Proposal slip approved with the selected insurer; released to marketing and the client
- 16.07 Packaged product catalogue with rates, taxes and limits
- 16.08 Package maintenance request raised for validation and approval
- 16.09 Approver validates the product change
- 16.10 Change applied and a release advisory published
- 16.11 Insurer panel with accreditation and SFTP enrolment for placement channels

Product Maintenance & TSU

Packages change only through an approved maintenance request that publishes a release advisory. Non-packaged accounts go through the TSU: request → completeness check → quotation slip → TL approval → RI referral → insurer quotes with acceptance evidence → comparative table → proposal slip approval.

130

Where to open BrokerVerse

1 Demo with sample data

<https://claude.ai/artifact/J5CoEBTpXYt77pVyruPQ5v>

Sign in as admin / Admin@123, or any persona with Broker@123. Actions are simulated.

2 Illustrated walkthrough

<https://claude.ai/artifact/EFoSW1GzSezVPJ8QhgeKvi>

The same screens as this deck, with full-size captures.

3 Full platform on your machine

`npm install · npm run setup · npm run dev`

Then browse to <http://localhost:5173>. Docker: `docker compose up --build` serves <http://localhost:8080>.

4 Regenerate the screens

`npm run walkthrough`

Re-runs every process in a browser against a running local stack and rebuilds the page.
