

BDO Insurance & Reinsurance Brokers

How BDOI works, end to end

The sixteen signed-off process flows in HL_Process_Overview integrated into one operating model: the whole chain on one picture, where the money goes, the life of one policy, twelve stages with their BrokerVerse screens, the satellite processes, hand-offs, controls and clocks.

What BDOI does

A broker between BDO's clients and the insurance market. Revenue is commission on premium placed, plus reinsurance commission as cedant.

Clients

Bank-referred consumer accounts (CBG home, motor, fire), corporate, branches, retail, group employee benefits

Counterparties

Accredited insurers (SFTP-enrolled or email), reinsurers and RI brokers

Units

Marketing, TSU, Reinsurance, Processing, Cashiering, Collections, Disbursement, FRBS, Claims, Contact Centre, Compliance

Controls

Maker-checker wherever money or cover changes; segregation of duties; audit trail on every decision

THE CHAIN

One loop. Renewal opens 140 days before expiry and an accepted renewal re-enters placement, so a policy that is cared for never leaves the chain. Claims and servicing run beside it while the policy is in force; the ledger records every step.

The whole chain on one picture

Read left to right: each lane is a unit or counterparty, each column a stage. Gold boxes are the client's own steps; dashed arrows are conditional branches (non-packaged risk to TSU, large risk to reinsurance, claim accepted only when premium is paid). The BDOIR end-to-end flow integrated with the New Business, TSU, Reinsurance, Operations, Collections, Disbursement, FRBS, ACSL, Refund, Claims, Case Management and Renewal flows.

Where the money goes

Gross premium arrives through the cashing channels and is applied to the invoice; the weekly remittance extract pays insurers the net premium through the disbursement chain. When a client pays the insurer directly, BDOI bills the insurer for its commission. Refunds go back only through a Refund Request Form and the disbursement chain. Claims money never passes through BDOI. As cedant, BDOI remits reinsurance premium and collects reinsurance commission.

The life of one policy

Collections start 10-15 days after booking and the credit term is 60 days; a commitment beyond it needs a credit-term extension. Claims are accepted only while the policy is in force and the premium is paid. The renewal master expiry list opens 140 days before expiry, with renewal advices at 70 and 45 days; an accepted renewal is placed and booked like new business.

Twelve stages

Each stage has its units, a trigger, activities, outputs, a control, a clock and a BrokerVerse screen. The following slides take them one by one.

1 Onboarding & screening

Marketing Account Officer (MAO) · Compliance

2 Quotation & proposal

MAO · Marketing TL · TSU (non-packaged) · Reinsurance

3 Placement with the insurer

Processing Team / Officer (PT/PO) · Insurer

4 Booking, invoicing & e-policy

PO (maker) · Underwriting Head (checker) · COG-OPRM · Contact centre

5 Cashiering & payment application

Cashiering Team · UPP handler · Marketing (direct payments)

6 Marketing collections

Collection Handler · MAO · Unit / Finance Head

7 Remittance & disbursement

Operations (extract) · Disbursement
DPO → DTL → DSH → DUH · Insurer

8 FRBS ledger & reconciliation

FRBS Accounting Assistant · TL · Team Head · Accounting Processor (ACSL)

9 Adjustments, cancellations & refunds

Adjustment Team · Operations checker-poster · MAO · Marketing TL · Unit Head

10 Claims

Claim handler · Insurer / adjuster · Assured · Casa / dealer

11 Customer servicing & case management

BDO Contact Centre (CCC) · BDO Insure agent · Fulfilment units

12 Renewal (automated RMEL)

Sanitation Handler · Marketing TL / Team Head · PO · Insurer

1

Onboarding & screening

Marketing Account Officer (MAO) · Compliance

STARTS WHEN A prospect walks in, a BDO branch or loan unit refers a client (CBG home / motor loans, CLPC), or a corporate account is prospected.

- Client created with KYC details and TIN
- Automatic sanctions and PEP screening; hit → Compliance clears or declines
- Risk score and tier set the customer due-diligence level

PRODUCES Client record (CLT-no.), screening result, CDD level

CONTROL No quotation without a screened client; declined clients cannot transact.

2

Quotation & proposal

MAO · Marketing TL · TSU (non-packaged) · Reinsurance

STARTS WHEN Screened client requests cover, or a renewal/conversion opportunity is opened.

- Packaged product: rating engine prices premium, VAT, DST, LGT, FST and commission from the product table
- Non-packaged risk: TSU request → completeness and duplicate check → quotation slip → TL approval → RI referral if needed → sent to insurers → responses with evidence → comparative table → proposal slip approved
- Proposal emailed; client accepts or declines with reason; hold cover can be requested from the insurer

PRODUCES Quotation (QT-no.), proposal, TSU proposal slip, hold-cover request

CONTROL Non-packaged products cannot be quoted without an approved TSU proposal; acceptance limits and survey threshold checked at quotation.

CLOCK TSU SLA escalation on breach; insurer follow-up until all quotes are in

Placement with the insurer

Processing Team / Officer (PT/PO) · Insurer

STARTS WHEN Client acceptance recorded.

- Policy shell created in status placement requested
- Placement slip sent by SFTP when the insurer is enrolled, otherwise by email
- Insurer returns (reason routed to marketing, resubmitted) or places the risk and issues the policy

PRODUCES Policy (POL-no.), placement slip, insurer policy reference

CONTROL Channel decided by the insurer record; returns carry a reason and can be resubmitted.

CLOCK Facultative RI: acknowledge within 24 hours, slip within 3 working days

FLows NEW BUSINESS · RENISURANCE

SCREEN New Business > Placement · Reinsurance > Facultative placements

In BrokerVerse: New Business > Placement · Reinsurance > Facultative placements

4 Booking, invoicing & e-policy

PO (maker) · Underwriting Head (checker) · COG-OPRM · Contact centre

STARTS WHEN Risk placed and e-policy received.

- Book & invoice raises a policy_issue approval; the checker approves
- On approval: policy in force, invoice (premium receivable) generated, booking journal posted
- E-policy delivered to the client via COG (SFTP) or PO email; fall-outs go to the contact centre with the exception reason

PRODUCES Invoice (INV-no.), booking journal, e-policy, exception report

CONTROL Maker-checker with segregation of duties; only in-force, renewed or expired policies can carry claims.

CLOCK Same day once placed

5 Cashiering & payment application

Cashiering Team · UPP handler · Marketing (direct payments)

STARTS WHEN Client pays: bills payment, OTC cash or cheque, CLPC / PMS / trade batch files, direct credit, autopay, or directly to the insurer.

- Payment applied to the invoice; official receipt issued; cash and premium journals posted
- Post-dated / OTC cheques held 4 days, then matured and applied, or tagged bounced (exclusion list)
- Zero-PR or excess payments become unapplied premium (GL 2400) until matched
- Direct payment to insurer: commission receivable (GL 1250) identified → billed → approved → collected with a commission OR

PRODUCES Official receipt (OR-no.), PDC register, unapplied list, commission billing

CONTROL Cheques cannot mature before the clearing date; unapplied premium never sits against an invoice.

CLOCK 4-day cheque hold

FLAWS OPERATIONS · BDOIR E2E

SCREEN Operations > Invoices & cashiering · Payments / PDC / UPP · Direct payments

BDOI operating model · BrokerVerse · delivered by iorta TechNXT

The screenshot shows the BrokerVerse Operations interface. The left sidebar contains navigation links: HOME Dashboard, PRODUCTION OPS Operations (selected), FINANCE CLNM Collections, and INSIGHT RPT Reports & Analytics. The main content area is titled 'Operations' and includes a description: 'Cashiering across payment channels with PDC monitoring and unapplied premium, direct payment commission receivables, adjustment/cancellation endorsements under checker-poster, and monthly production reconciliation with insurers.' Below this is a tabbed interface with 'Invoices & cashiering' selected. A search bar and a 'Payment without invoice' button are present. The main table lists invoices with columns: INVOICE, POLICY, CLIENT, DUE, AMOUNT, PAID, BALANCE, STATUS, and buttons for 'open' and 'Receive'. The last row is highlighted with a yellow box and a tooltip: 'Cheque held until 2026-09-27 (PDC monitoring)'.

6 Marketing collections

Collection Handler · MAO · Unit / Finance Head

STARTS WHEN Invoice unpaid after booking.

- PR list by market segment with ageing and stage: newly booked → within credit term → committed → overdue → escalate
- Marketing diary records when, where, how and what of every effort; SOA and reminders sent
- Commitment beyond the 60-day credit term emails the MAO; a credit-term extension (CTE) needs Unit Head approval

PRODUCES Statement of account, effort diary, CTE request

CONTROL Collect within 10–15 days of booking; CTE extends the due date only after approval.

CLOCK 60-day credit term

FLows MARKETING COLLECTIONS

SCREEN Collections

In BrokerVerse: Collections

Remittance & disbursement

Operations (extract) · Disbursement DPO → DTL → DSH → DUH · Insurer

STARTS WHEN Applied payments accumulate; weekly cycle (Monday to Friday coverage).

- Weekly remittance extract per insurer, sanitised (direct-paid and already-remitted policies excluded, endorsements and knock-offs removed)
- Submission creates a disbursement voucher; reviewer, section head and unit head sign in sequence
- Payment posted with cheque or transaction reference; confirmation email to the requestor; GL batch posted
- The same chain pays refunds, suppliers, reimbursements and cash advances

PRODUCES

CONTROL

Remittance schedule, disbursement voucher, payment journal, confirmation email

Requester, reviewer, approver and payer are different people; nothing is paid without the approval chain.

CLOCK Weekly extract; end-of-day processing

FLows OPERATIONS · DISBURSEMENT

SCREEN Accounting & Disbursement > Remittances · Disbursements

In BrokerVerse: Accounting & Disbursement > Remittances · Disbursements

8

FRBS ledger & reconciliation

FRBS Accounting Assistant · TL · Team Head · Accounting Processor (ACSL)

STARTS WHEN Every transaction above posts a journal automatically; month and year ends.

- Chart of accounts maintained; system journals for booking, receipts, commissions, remittances and refunds
- Manual journals drafted, reviewed by the TL and posted by the FRBS approver
- ACSL: insurer statement of account reconciled with the subsidiary ledger; abnormal balances raise adjustment entries
- Period close and reopen; fiscal-year close moves nominal balances to retained earnings; trial balance and financial reports

PRODUCES Journals, trial balance, financial reports, SOA reconciliation runs

CONTROL Double-entry ledger; closed periods reject postings; only the Finance Head reopens a period.

CLOCK Monthly on an agreed date; year-end

FLows FRBS - ACCOUNTING · ACSL

SCREEN Accounting & Disbursement > Journals · Trial balance · Periods & year-end · ACSL / SOA recon

In BrokerVerse: Renewal · Submitted Policies > Expiring (150 days)

Satellite processes and where they plug in

Four flows run beside the main chain and feed it at specific stages.

Facultative reinsurance

Feeds stage 2-3 for large or special risks referred by TSU: request → acknowledge (24 h) → underwriting information loop → slip with reinsurers, security rating and signed-slip evidence (3 working days) → closing and debit note to the cedant. RI commission is monitored with the Commission Receivable Unit.

RENINSURANCE

Employee benefits

A parallel new-business and renewal track for group schemes: renewal advice → Broker of Record → Terms of Reference with master list and utilisation released to insurers → comparative analysis (premium, benefits, capabilities) → client confirmation and award, with ISACOM approval for a non-accredited provider → handoff to processing and collections (stages 4-6).

EMPLOYEE BENEFITS

Submitted policies

Policies the client bought elsewhere and submitted to the bank for its loan: masterlist validated, matched and consolidated; adequacy reviewed; findings issue an Insurance Adequacy Assessment Form; accounts 150 days from expiry go to the sanitation handler as renewal or conversion opportunities (stage 12).

Submitted Policies

Product maintenance

Keeps stage 2 honest: package creation or change requests are validated, approved under maker-checker and published as a release advisory to Marketing, Operations and TSU; the insurer panel records accreditation (drives ISACOM) and SFTP enrolment (drives the placement channel).

PRODUCT MAINTENANCE TSU

Process hand-offs

Each hand-off is a document or a state that one process writes and the next one reads.

Onboarding → Quotation

Only a screened client can be quoted; the client number carries into every later document.

Quotation → TSU → Reinsurance

Non-packaged risks leave New Business for a TSU quotation slip; large or special risks are referred to RI before quoting; the approved proposal slip returns to New Business.

Placement → Booking → Cashiering

Placement creates the policy; the checker's approval creates the invoice; cashiering works only from invoices.

Cashiering → Collections

Unpaid invoices become the PR list; applied payments leave it. Beyond-term commitments raise a CTE for the Finance Head.

Cashiering → Remittance → Disbursement → Insurer

Applied premium is extracted weekly, sanitised and paid to insurers through the four-signature chain; direct-paid policies are excluded.

Endorsement → Refund → Disbursement

A cancellation or adjustment with a refund raises an RRF; TL review and Unit Head sign-off create the refund voucher.

Process hand-offs (continued)

Each hand-off is a document or a state that one process writes and the next one reads.

Everything → FRBS ledger

Booking, receipts, commissions, remittances, refunds and settlements post journals automatically; manual entries and ACSL adjustments post only after review and approval.

Collections → Claims

Claims Acceptance Control reads the invoice balance: an unpaid premium blocks registration.

Booking → Renewal → Placement

In-force policies enter the RMEL 140 days before expiry; an accepted renewal re-enters placement and booking.

Submitted policies → Renewal

Adequacy-reviewed bank-submitted policies feed the sanitation handler 150 days before expiry.

Contact centre → Fulfilment units

Account-related cases are routed to the unit that owns the account; returns go back to the CCC for re-logging.

Product maintenance → New Business / TSU

Release advisories tell Marketing, Operations and TSU what changed in a package and from when.

Controls: who makes, who checks

Every decision that changes cover or money is maker-checker with segregation of duties.

Decision	Maker	Checker / approver	Approval type
Policy booking	PO / MAO	Underwriting Head	policy_issue
Product change	Product admin	Underwriting Head	product_change
Endorsement	Adjustment Team	Operations checker-poster	endorsement
Manual journal / ACSL adjustment	FRBS Accounting Assistant	FRBS TL then approver	journal
Disbursement	DPO	DTL → DSH → DUH (Finance Head)	disbursement
Credit-term extension	Collection Handler	Unit / Finance Head	cte
Claim settlement	Claim handler	Approver	claim_settlement
EB award to non-accredited insurer	EB Officer	ISACOM	eb_award
Refund request	MAO	Marketing TL review, Unit Head sign-off	RRF

Clocks: the turnaround times the flows commit to

Clock	Commitment
Facultative RI acknowledgement	24 hours
Facultative RI slip	3 working days
Cheque clearing hold	4 days
Collect newly booked	10–15 days from booking
Credit term	60 days
Remittance extract	Weekly, Monday–Friday coverage
RMEL window	140 days before expiry
Initial / final renewal advice	–70 / –45 days
Submitted policies to sanitation	150 days before expiry
Submitted policy hold cover	30 days
Contact-centre case TAT	Hours per category
Ledger close	Monthly on an agreed date; year-end
